Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

1. Applicant's election without traverse of claims 1-28 in the reply filed on 10/14/2004 is acknowledged.

Applicant is further required to elect one of the following inventions:

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 11-17 and 18-21, drawn to a blind trimming device having an elastic member for biasing a cutting blade and a cutting tool into a shearing engagement, classified in class 83, subclass 582.
 - II. Claims 1-10, drawn to a blind trimming device with different types of cutting blades and cutting tools, classified in class 83, subclass 633.
 - III. Claims 22-24, drawn to a blind trimming device having a cutting tool and a cutting blade, each having different hardness number, classified in class 83, subclass 613.
 - IV. Claims 25-28, drawn to a blind trimming device having an insert for supporting blinds, classified in class 83, subclass 467.1.

Inventions of Group I and Groups II-IV are related as combination and subcombination. Inventions in this relationship are distinct if there is evidence that the combination does not rely on the subcombination for patentability. See MPEP 806.05 (c), example 3. For example, Group II is evidence that the combination of Group I does not rely on the types of cutting blades and cutting tool of Group II for patentability. Group III is evidence that the combination Group I does not rely on the hardness number

Art Unit: 3724

of the cutting blade and the cutting tool of Group III for patentability. Group IV is evidence that the combination Group I does not rely on the insert for supporting blinds of group IV for patentability.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. If Applicant elects group I or group II above then Applicant must further elect from the following group:

This application contains claims directed to the following patentably distinct species of the claimed invention related to claims 1-10 and claims 18-21:

Species A: a cutting tool having a locating protrusion and a cutting blade having a locating recess. Figs. 1-6.

Species B: a cutting tool having a locating recess and a cutting blade having a locating protrusion. Figs. 7-9.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 18 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3724

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phong H Nguyen whose telephone number is 571-272-4510. The examiner can normally be reached on Mon-Fri.

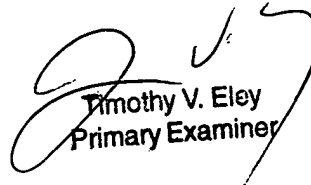

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
